

Canaries in a Coal Mine

Recognizing early signs of trouble can save you from big issues later.

From your mouse cursor moving on its own, getting notifications for a delivery, but the address isn't yours, piles of forms with non-public customer information stacked in loan officer's offices to tellers that write down login information

Those are some dead canaries: signs that something bad has already happened !!!

Establishing a culture of security at your organization isn't an easy task, it requires the participation from employees at all levels of an organization and even includes intangible aspects like attitudes.
