

# *Gone Phishing*

## Don't get phished!

- Don't open any attachments that you are not expecting.
- Verify the authentication of an e-mail or its sender.
- Confirm your authorization to perform actions requested in an e-mail.
- Don't enter sensitive information on unsolicited websites.
- Never use your network login username / password on websites.
- When in doubt, don't! Call your Information Security Officer or Network Administrator.
