

# 6 TIPS FOR SAFE ONLINE SHOPPING

## Shop at websites you trust

To play it safe, consider doing online business only with retailers you trust and have shopped with before.

## Pay with a credit card

You'll usually get the best liability protection online and offline when you use a credit card.

## Check out website security

That small padlock icon in the corner of your URL field tells you that the webpage you're on has privacy protection installed.

## Beware Attachments!

Avoid opening attachments sent to you in email, even from people you know. (They could be viruses!)

## Avoid Phishing or Other Scams

Clicking on links from untrusted sources in email, text, or the web has risks, including fraud, malware distribution, and credential harvesting.

## Check your statements

Check your statements for fraudulent charges periodically, or set up account alerts.
